EM730 Series Inverter

Single-phase/three-phase 200V-240V 0.4kW-2.2kW
Three-phase 200V-240V 4.0kW-90kW
Three-phase AC 340V-460V 0.75kW-450kW

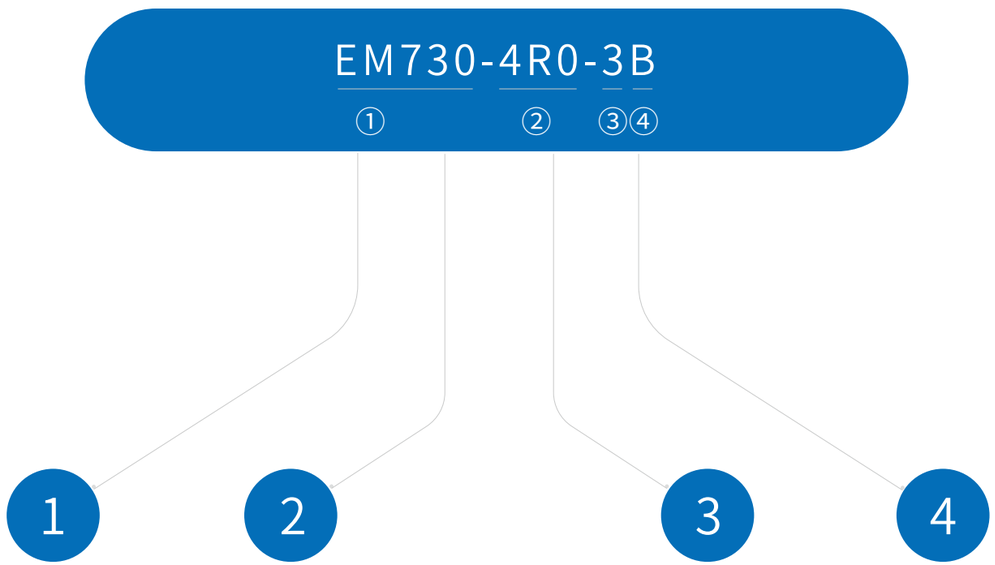

The EM730 series inverter is a high-reliability general-purpose inverter launched by SINEE. EM730 supports three-phase AC asynchronous motors and permanent magnet synchronous motors. They support a variety of drive control technologies, such as the vector VF (VVF) control and speed sensorless vector control (SVC); speed output and torque output; and Wi-Fi access and background software debugging.

Features of the EM730 series inverter:

1.Support the mobile APP and Wi-Fi module to facilitate inverter debugging and monitoring
2.Reliable operation with full load at 50°C ambient temperature
3.Integration of special functions for rewinding and unwinding
4.Support the high-frequency output up to 3000Hz for driving high-speed motors
5.Support the 100kHz high-speed pulse input
6.The metal substrate should adapt to the vibratory environment to reduce the induced voltage of the motor.
7.The built-in filter is close to Level C3, so the external interference is greatly reduced.
8.Support STO SIL3 Function

BR100 Series
Energy Consumption Braking Unit

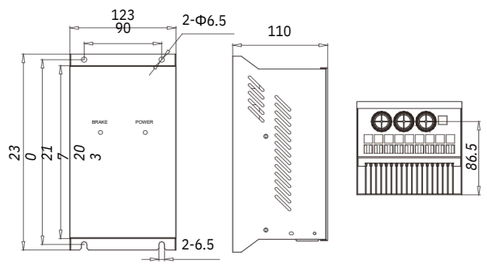

The BR100series braking unit has the stable and reliableworkingperformance and protection against over-temperature and braking resistorshort circuit, and can be used forinverter-drivenlifting equipment, centrifuges, washing machines, spin dryers, and rapid parking. It can change the electricenergygenerated by the motor in thepower generation state into the thermal energy to be used by the braking resistor. In addition, it is easy to use and compatible with inverters of various brands.

Model and specification	Application	Minimum Resistance (Ω)	Average Braking Current I（avA)	Peak Current I m （axA)	Applicable Inverter Power (kW)
